Android Devices	Device compatibility can be found on our online Community
Virtualisation	Any virtual environment must be allocated dedicated system resources that match our Hardware and Operating System requirements.

LEAP can be run on Apple computers via virtualisation technologies such as Boot Camp, Parallels or VM Ware. This virtualised environment must have supported versions of Windows and Office installed, and meet the minimum specification in terms of designated resources. Folder sharing must be enabled for the import of documents.

Performance on a virtual environment is the sole responsibility of your firm.
